Proceedings of the 109th Colloquium of the International Astronomical Union, held in Gaithersburg, Maryland, 27–29 July 1988

APPLICATIONS OF COMPUTER TECHNOLOGY TO DYNAMICAL ASTRONOMY

Introduction / P. K. Seidelmann and J. Kovalevsky ix

Part 1 / APPLICATIONS OF COMPUTERS TO SOLVING PROBLEMS

R. L. DUNCOMBE / Early Applications of Computer Technology to Dynamical Astronomy 1

J. KOVALEVSKY / Applications of Computers to Celestial Mechanics 11

R. H. MILLER / Applications to Stellar and Galactic Dynamics 19

LIN LIU and YI-SUI SUN / Application of Computer in Qualitative Studies of Celestial Mechanics 27

GENE G. BYRD, M. THOMASSON, K. J. DONNER, B. SUNDELIUS, T. Y. HUANG and M. J. VALTONEN / Leading Spiral Arms, Retrograde Galaxy Encounters and Massive Halos 31

M. J. VALTONEN, S. MIKKOLA and T. Y. HUANG / On Construction of Analytic Solutions to the Three Body Problem by Use of Computer Experiments 37

P. J. MESSAGE / The Use of Computer Algorithms in the Construction of a Theory of the Long-Period Perturbations of Saturn's Satellite Hyperion 45

T. KIANG / Some Numerical Aspects in a Search for I=1 Periodic Orbits for Hecuba Asteroids 55

HE MIAOFU, ZHU WENYAO, FENG CHUGANG HUANG CHENG, and CHANG HUA / SHORDE I Program System and Applications 61

S. FERRAZ-MELLO / A Semi-numerical Expansion of the Averaged Disturbing Function for Some Very-high-eccentricity Orbits 65

F. VÁRADI / Symbolic Algebra Software for Planetary Theories 69

TOSHIO FUKUSHIMA / Tests of the Extrapolation Method for the Numerical Integration of the Keplerian Motion 73

PAUL HERTZ and STEPHEN L. W. McMILLAN / Application of a Massively Parallel Computer to the N-body Problem 77

E. MORENO and P. PIŞMIŞ / Hydrodynamical Models of Elliptical Galaxies 81

E. ATHANASSOULA, S. MORIN and K. H. PRENDERGAST / A Multifluid Code for Problems of Elliptical Galaxy Formation and Evolution 83

A. P. BOSS / 3D Hydrodynamics and Radiative Transfer 85

HAROLD A. WILLIAMS / First-order and Second-order 3-D Hydrodynamics: A Comparison 89

C. FROESCHLÉ and H. RICKMAN / Chaotic Dynamics and Monte Carlo Modelling 93

A. ABAD, E. ELIPE and M. L. SEIN-ECHALUCE / Software Tools for Nonlinear Dynamics 99

V. T. COPPOLA and R. H. RAND / Computer Algebra, Lie Transforms and the Nonlinear Stability of L_4 103

J.-P. J. LAFON / Solution of an Infinite Number of Inequations Depending on a Continuous Parameter and Application to the Solution of Equations in Dynamical Astronomy 105

TABLE OF CONTENTS

Part 2 / MATCHING PROBLEMS WITH TECHNOLOGY

A. MILANI / Planet Crossing Asteroids and Parallel Computing: Project Spaceguard 111
D. D. CARPINTERO, J. C. MUZZIO and M. M. VERGNE / Implementation of an N-body Code in a HP1000 Computer 119
R. L. RICKLEFS and P. J. SHELUS / Computer Applications to Lunar and Artificial Satellite Laser Ranging 125
J.-E. ARLOT, W. THUILLOT, F. COLAS, CH. ALLET and D. T. VU / The Use of Image Processors for Acquisition and Reduction of Astrometric Data in Real Time 129
E. F. MILONE, G. GROISMAN, D. J. I. FRY and S. J. SCHILLER / Modeling of Asymmetric Light Curves of Eclipsing Binaries on the Cyber 205 Supercomputer 135
JUNICHIRO MAKINO and PIET HUT / Galaxies in the Connection Machine 141

Part 3 / NEW METHODS OF MATHEMATICAL PROGRAMMING

V. A. BRUMBERG, S. V. TARASEVICH and N. N. VASILIEV / Specialized Celestial Mechanics Systems for Symbolic Manipulation 149
A. OLLONGREN / On a Restricted (2n+3)-Body Problem 163
RICHARD L. BRANHAM, Jr. / The Simplex Method for Nonlinear Mass Determinations 169
MARC A. MURISON / An Optimum Method for Calculating Restricted Three-Body Orbits 175
R. CUSHMAN and J. A. SANDERS / The Constrained Normal Form Algorithm 181

Part 4 / MATCHING COMPUTER LANGUAGE TO THE PROBLEM

ANDRE DEPRIT and BRUCE MILLER / Simplify or Perish 189
D. S. SCHMIDT / The Stability of the Lagrangian Point L_4 201
R. A. HOWLAND / Computer Implementation of a New Approach to the Ideal Resonance Problem 207
PIET HUT / A Laboratory for Gravitational Scattering Experiments 213
G. A. KRASINSKY, F. A. NOVIKOV and V. I. SCRIPNICHENKO / Problem Oriented Language for Ephemeris Astronomy and its Realisation in the System ERA 219

Part 5 / USE OF NUMERICAL VERSUS ALGEBRAIC COMPUTATION

HIROSHI KINOSHITA and HIROSHI NAKAI / Numerical Integration Methods in Dynamical Astronomy 231
JACQUES HENRARD / A Survey of Poisson Series Processors 245
R. A. BROUCKE / A FORTRAN-based Poisson Series Processor and its Applications in Celestial Mechanics 255
D. L. RICHARDSON / PARSEC: An Interactive Poisson Series Processor for Personal Computing Systems 267
O. CALAME and J. D. MULHOLLAND / The Problem of the Eulerian Oscillations: A Weakness of Numerical Versus Analytical Methods 275
R. VILHENA DE MORAES / A Semi-Analytical Method to Study Perturbed Rotational Motion 281
WILLIAM W. ROBERTS, Jr. and DAVID S. ADLER / Computational Studies of Cloudy Gaseous Galactic Disks 285

Part 6 / REPRESENTATION AND TRANSMISSION OF RESULTS

A. M. NOBILI / Synthetic Secular Theories of the Planetary Orbits: Regular and Chaotic Behaviour 293
X. X. NEWHALL / Numerical Representation of Planetary Ephemerides 305
P. KAMMEYER / Compressed Planetary and Lunar Ephemerides 311

TABLE OF CONTENTS

B. JOVANOVIĆ / An Analytical Representation of Ephemeris Data 317

R. A. KOLVOORD and J. A. BURNS / Numerical Simulations of Narrow Planetary Rings: An Animation 321

L. E. DOGGETT, T. S. CARROLL, J. A. DeYOUNG, J. R. ROHDE, J. A. BANGERT, W. T. HARRIS, S. P. PANOSSIAN, W. J. TANGREN, and P. C. KAMMEYER / Electronic Almanacs Mating the Message and the Medium 323

Vol. 45 No. 4 1988/89

J. HENRARD / Note on the Reducing Transformation and Secular Coupling 327

S. R. MARANDI and V. J. MODI / An Alternate Transition from the Lagrangian of a Satellite to Equations of Motion 333

R. K. DAS, A. K. SHRIVASTAVA, and B. ISHWAR / Equations of Motion of Elliptic Restricted Problem of Three Bodies with Variable Mass 387

J. L. BRUN and A. F. PACHECO / On Gravitational Orbits and the Virial Theorem 395

M. S. STANIUCHA and M. BANASZKIEWICZ / Efficient Numerical Routines to Find the Averaged Motion of Small Dust Particles under the Poynting-Robertson Force 401

R. A. HOWLAND / A Note on the Application of a Generalized Canonical Approach to Non-Linear Hamiltonian Systems 407

Erratum to B. Bertotti, 'Supplemental Satellites and Lunisolar Precession', *Celestial Mechanics* **44** (1988), 31 413
